A TOKEN BACKED BY THE TOP CRYPTO VOTING PLATFORM

CHTRv2 TOKEN

OFFICIAL WHITEPAPER

COINHUNTERS.CC

OCTOBER 24, 2021

OCTOBER 24, 2021

Overview

CHTRv2 is a simple token that is powered by coinhunters.cc; built on the Binance Smart Chain. CHTRv2's token symbol is \$CHTRv2. We are launching CHTRv2 to ensure that the community is rewarded well for its holding power. Apart from its 2% burn mechanism, we will also put a marketing wallet to ensure that publicity is sufficient enough to populate the moon. CHTRv2 is backed by Coinhunters.cc, a website well known for its comprehensiveness regarding crypto projects. This website is particularly worth mentioning because it is the top crypto voting platform worldwide. CHTRv2 will be a huge project in BSC tokens because of its frequently visited website, tokenomics, and marketing plans.

Vision

With the increasing rug pull incidents in the binance smartchain tokens across the Pancakeswap, we decided to step forward and use our platform to launch a token that rewards the community in the best possible way. The basic mechanism is the same as other burning systems. The only difference is we have a notable, and reliable website with really high visitor traffic. We also have trustworthy marketing staff and developers. We also have lifetime ads at Coinhunters.cc. Our project is different from those that rely heavily on marketing wallets, and if buyers don't show up, the projects vanish altogether. That is why it's tokenized. The value is in the number of visits, the number of projects inside, the reputation, and the website itself.

How Does Our System Work?

To accomplish the primary objective of rewarding the community, CHTRV2 has a transaction fee of 11%. A handsome 2% will be burnt so that we can have limited supply which makes our token more valuable. 3% of the tax goes into liquidity, providing an ever-increasing price floor, micro-market stability, and ease of swap because of the increasing liquidity pool. The remaining 6% goes to marketing funds to help the holders remain calm and focused. This mechanism helps the token value remain stable by slowly taking dumping power out of the hands of paper hands.

Therefore, the total taxation is 11% and will be used to promote value stability, and provide publicity through our marketing wallet.

Benefits

CHTRv2 is a complete package because of its burning mechanism and tokenomics. Holding more than 100,000 tokens of CHTRv2 will also qualify the holder for 10% off on ads placement on the website.

To help grow the project, we will be using 6% of the acquired funds to allocate for marketing. This allocation will help increase the value of CHTRv2 long-term.

We have taken care of the stability of the project, too. Hence, 3% of the funds will be used for the liquidity pool.

As the project's growth continues, we will be looking for partnerships with notable projects soon. We are also aiming for new listings to grow in the years to come. Once the CHTRv2 brand is better established, we will use some funds for charity and leave the rest for marketing and community competitions.

Token Details

- Name: CHTRv2
- Symbol: \$CHTRv2
- Blockchain: Binance Smart Chain
- Supply: 100,000,000

- Tax:
 - 2% auto burn.
 - 3% goes to Liquidity Pool (Locked)
 - 6% for Marketing and Developments

- Second marketing campaign
- 10% discount for holders(min 100khold)
- 5k projects listed on our platform

QUARTER 4

- Coinmarketcap listing
- Achieve 2500+ holders
- Major Marketing campaign
- New partnerships (TBA)
- Apply for new exchange listings
- 8k projects listed on our platform

QUATER 1

- New usecases to be announced

Summary

CHTRv2 is a fresh program to be launched on the Binance Smart Chain. It has received a lot of attention in its first few days of marketing. This program is designed to reward the crypto community, and for this purpose, we have already charted out a plan. To put it concisely, CHTRv2 helps the investors and will prove to be a precious project in the crypto space.
